

Pininfarina signs the Ferrari Superamerica

Monday, 29 November 2004

It is designed by Pininfarina the fastest convertible berlinetta in the world, thanks to the 320 Km/h speed that the Ferrari Superamerica, the name of the new Ferrari, is capable of reaching.

The hood opening mechanism, the electro-chromic technology and the 540 bhp complete the package. The car will be officially presented at the Detroit and Los Angeles motor shows and will be produced in a limited edition series.
