

The novelty of Pininfarina for Calligaris at the 2011 Furniture Fair in Milan

Soft lines and innovative technology for "Orbital", extendable table made of transparent glass

Turin, March 25, 2011 - Avant-garde design and technology meet in the extendable table *Orbital* designed by Pininfarina in collaboration with technical studio Calligaris, who developed the ingenious opening mechanism. *Orbital* is one of the novelties designed by Pininfarina at the next International Furniture Fair in Milan, scheduled for April 12 to 17 (Calligaris: Hall 12/stand C11-D18).

Thanks to its flowing lines and the materials used, the table *Orbital* is a scenic presence in the house environment, the real star of the dining area. The basis of stiff polyurethane, painted black or white, gives strong stability to the structure, while a wide central opening gives it great lightness and character.

The new extra-transparent glass allows you to appreciate the ingenious opening mechanism with metal arms. This system with clean and minimalist lines supports two glass extensions, that simultaneously open with a fluid circular motion.

Once opened, the table can accommodate ten seats. All metal parts are painted in the new Matt Silver finish, with an effect enhancing the whole.

Technical Data

Base: painted matt silver

Column: polyurethane painted matt black, matt white or glossy white

Floor: extra-transparent tempered glass

Size in cm: 165 L (255) x P 105 - H 75 cm
