

NGS Razza, the mouse designed by Pininfarina

Turin, September 22, 2011 - **Pininfarina** designed **Razza**, the new **mouse** presented by **NGS**. It is a wireless laser mouse which, with 800 dpi optical resolution and 2.4 Ghz RF, ensures computer communication range of up to 10 meters. Moreover Razza has a USB connection.

The design evokes the spirit of the sports cars with a great consideration to details: a careful combination of different materials and textures has given birth to an elegant object with a strong hi-tech character. Furthermore, it includes an aluminium wheel that lends it an air of distinction.

Finally, it includes an original velvet sheath that protects the device from damage and allows to storage this precious jewel.
